Abstract:

Now a days many people are being affected from OCD. Mental illness also affects physical health as well as financial health. Many people are unaware about how to get rid of the problem. Many people hesitate to speak out their problem to their family members and friends. Also, day by day the suicidal death rates also increasing due to this mental illness problems. Not only OCD but also other mental illness like Depression, Anxiety disorder like this mental illness is also increasing day by day. So, chatbot can also be created to solve these kind of mental health issues and the accuracy of the chatbot can be increased and some updates can be done to this. Not only giving solutions, chat bot can be made to give some useful tips and advices on overcoming the problem without medications.
