

SHARE DO – Mobile Application

Share Do is a Mobile Application that helps students and working professionals to stay productive!

Problem Statement:

Many Students and working professionals have the habit of marking their daily task in a to-do list. They mark their tasks with the help of pen and paper or using some software tools. But a survey showed that **41 percent** of to-do list items never get completed and only **15 percent** of tasks completed during the day. Due to some reasons, they are unable to complete the tasks in their list. But while making the list they will be super confident of completing it. So, if this problem gets solved then wide range of people can stay productive.

Solution:

If you share your future goals with your friends and surroundings there is a huge possibility of achieving it.

The solution for the problem can be solved using a Mobile application. This application basically makes us stay productive. You have to create your to-do list and share the list with your friends. Once you shared your list, your friend will be notified. If you complete a single task and mark completed then your friend will be notified about the completion of task. Once you complete all the tasks for the day and finishes the list. Then you will ace the leader board. This works on the principle of **Share Your Task. Do your Task!**
